

Enhanced interoperability for multiple platforms funded by the OpenAIRE project

Andrea Bollini, Claudio Cortese, Susanna Mornati
www.4science.it - info@4science.it

4Science implemented:

**ResourceSync framework
in DSpace**

**Signposting patterns
in OJS**

**OpenAIRE Guidelines
for Data Archives
in Dataverse
and DSpace-CRIS**

**OpenAIRE project API
in DSpace-CRIS**

In February 2018, 4Science was awarded by OpenAire to increase interoperability features supported by the most broadly used web platforms for Literature Repositories, Data Archives, Journals platforms and CRIS/RIMS.

Our work implements the "Behaviours and Technical Recommendations of the **COAR Next Generation Repositories** Working Group".
